PROFESSIONAL SUMMARY

Cybersecurity graduate student (4.0 GPA) and IT professional with a strong foundation in network infrastructure, security operations, physical access control, and technical support. Holds CompTIA Security+, CompTIA Network+, and ISC2 CC, with applied experience in log analysis, traffic analysis, incident response, risk assessment, and NIST-aligned security documentation. Ranked in the top 5% of the National Cyber League, demonstrating hands-on capability across OSINT, cryptography, digital forensics, packet analysis, and defensive security.

CORE CYBERSECURITY SKILLS

Security Operations: Incident response, alert triage, escalation workflows, monitoring, log analysis, traffic inspection	Network Security: TCP/IP, VLANs, ACLs, firewalls, VPNs, DNS, DHCP, segmentation, Wireshark, Cisco Packet Tracer
GRC & Assurance: NIST-aligned controls, risk assessment, access control, policy documentation, compliance analysis	Tools & Systems: Windows Server, Linux (Kali/Ubuntu), VMware, Python, Java, SQL, technical documentation

CERTIFICATIONS & EDUCATION

Core Security: CompTIA Security+ · ISC2 Certified in Cybersecurity (CC)

Infrastructure: CompTIA Network+ · CompTIA A+ · CompTIA IT Fundamentals+

Specialized: EC-Council DFE, EHE, NDE · IMF Cyber Risk Supervision · HarvardX / MITx PredictionX

M.S. Cybersecurity Southern New Hampshire University · In Progress · GPA: 4.0

B.S. Information Technology – Cybersecurity Southern New Hampshire University · GPA: 3.985 · Summa Cum Laude

SELECTED PROJECTS & ACHIEVEMENTS

National Cyber League (Top 5%): Ranked 159 of 3,638 in log analysis, traffic analysis, cryptography, OSINT, and digital forensics.

Incident Response Framework: Developed a NIST-aligned ransomware/breach playbook covering containment, escalation, communication, and recovery.

Enterprise Network Security Design: Segmented architecture using ACLs, firewall controls, and secure access practices to reduce lateral-movement risk.

Healthcare Data Breach Analysis: Evaluated incident impact using CIA principles to identify compliance gaps and mitigation steps.

Information Assurance & Risk Plan: Assessed system risks, prioritized controls, and documented recommendations for protecting organizational data and access.

RELEVANT CYBERSECURITY EXPERIENCE

Cybersecurity Graduate Coursework & Lab Practice SNHU / Independent

2023 – Present

- Graduate-level labs covering threat detection, secure network engineering, risk management, vulnerability analysis, and security documentation.
- Analyzed logs, network traffic, and packet captures via Wireshark and Linux tools to identify anomalous patterns and indicators of compromise.
- Produced NIST-aligned deliverables including incident response procedures, risk assessments, access control guidance, and training-manual content.

PROFESSIONAL EXPERIENCE

Technical Support Specialist Independent Practice – Manchester, NH

2006 – 2020

- Designed, configured, and secured LAN/WAN environments for residential and SMB clients including routers, wireless networks, firewalls, and endpoint security.
- Developed SOPs and repeatable troubleshooting workflows, reducing average resolution time by 25% and decreasing repeat support requests.
- Created technical documentation and user guides helping non-technical clients understand system changes, security recommendations, and maintenance needs.

Lead Associate Amazon – Nashua, NH

2021 – 2023

- Coordinated real-time logistics operations and issue resolution in a high-volume environment, maintaining operational continuity and secure handling of physical assets.

- Led workflow improvements; used structured documentation to track issues, improve shift handoffs, and maintain clear operational records.

Maintenance Technician Walmart – Manchester, NH

2020 – 2021

- Performed preventive maintenance and diagnostics on critical facility infrastructure following safety, regulatory, and environmental compliance requirements.
- Maintained corrective-action logs and communicated infrastructure risks clearly to management and support teams.

Service Technician One Source Security & Automation – Bedford, NH

1996 – 2006

- Installed, serviced, and troubleshot surveillance cameras, physical alarms, biometric access control, and building automation systems.
- Built foundational expertise in physical security controls, low-voltage wiring, client-facing technical support, and equipment lifecycle maintenance.
