

LOGAN GARTH GOODWIN

Cybersecurity Analyst | Security Operations | GRC | Network Security

Somersworth, NH | 603-800-7169 | Logan@goodwinmail.net | linkedin.com/in/logan-g-goodwin | loganggoodwin.com

PROFESSIONAL SUMMARY

Cybersecurity graduate student and IT professional with CompTIA Security+, Network+, A+, ISC² CC, and hands-on experience across network security, technical support, incident response planning, and security systems. Skilled in NIST-aligned risk assessment, access control, network segmentation, firewall and VPN fundamentals, log review, and traffic analysis. Known for building practical, well-documented solutions, ranking 159 of 3,638 in the National Cyber League, and translating technical issues into clear action steps for business and end-user environments.

CORE CYBERSECURITY SKILLS

Security Operations	Incident response, alert triage concepts, escalation workflows, monitoring, log analysis
Network Security	TCP/IP, VLANs, ACLs, firewalls, VPNs, DNS, DHCP, segmentation, Cisco Packet Tracer
GRC & Assurance	NIST-aligned controls, risk assessment, access control, policy documentation, compliance analysis
Tools & Systems	Windows Server, Linux (Kali/Ubuntu), VMware, Wireshark, Python, Java, SQL, technical documentation

EDUCATION

M.S. Cybersecurity, Southern New Hampshire University | In Progress | GPA: 4.0

B.S. Information Technology - Cybersecurity, Southern New Hampshire University | GPA: 3.985 | Summa Cum Laude

CERTIFICATIONS & VERIFIED LEARNING

CompTIA Security+	CompTIA Network+
CompTIA A+ / IT Fundamentals+	ISC² Certified in Cybersecurity (CC)
EC-Council DFE / EHE / NDE	IMF Cyber Risk Supervision
HarvardX / MITx PredictionX	

SELECTED CYBERSECURITY PROJECTS & ACHIEVEMENTS

- National Cyber League: Ranked 159 of 3,638 participants, demonstrating applied skills in log analysis, traffic analysis, cryptography, OSINT, and digital forensics.
- Incident Response Framework: Developed a NIST-aligned ransomware and breach response playbook with containment, escalation, communication, and recovery guidance.
- Enterprise Network Security Design: Designed a segmented network architecture using ACLs, firewall controls, and secure access practices to reduce lateral-movement risk.
- Healthcare Data Breach Analysis: Evaluated incident impact using confidentiality, integrity, and availability principles; identified compliance concerns and mitigation steps.
- Information Assurance & Risk Management Plan: Assessed system risks, prioritized controls, and documented recommendations for protecting organizational data and user access.

PROFESSIONAL EXPERIENCE

Technical Support Specialist | Independent Practice | Manchester, NH | 2006-2020

- Designed, configured, and secured LAN/WAN environments for residential and small business clients, including routers, wireless networks, firewalls, and endpoint security tools.
- Troubleshoot hardware, operating system, network, and application issues while documenting root cause, corrective actions, and configuration changes.
- Developed SOPs and repeatable troubleshooting workflows that reduced average resolution time by 25% and decreased repeat support requests.
- Created clear user guides and technical documentation that helped non-technical clients understand system changes, security recommendations, and maintenance needs.

Lead Associate | Amazon | Nashua, NH | 2021-2023

- Coordinated real-time logistics operations and issue resolution in a high-volume fulfillment environment with time-sensitive service expectations.
- Led workflow improvements, communicated priorities across teams, and helped maintain operational continuity during changing workload demands.
- Used structured problem-solving and documentation habits to track issues, improve handoffs, and support consistent execution across shifts.

Maintenance Technician | Walmart | Manchester, NH | 2020-2021

- Performed preventive maintenance and diagnostics on electrical, HVAC, refrigeration, and facility systems while following safety and compliance requirements.
- Maintained corrective-action documentation and communicated system concerns clearly to management and support teams.

Service Technician | One Source Security & Automation | Bedford, NH | 1996-2006

- Installed, serviced, and troubleshoot surveillance cameras, alarm systems, access control, and building automation systems for client environments.
- Maintained high system availability through proactive diagnostics, component replacement, and clear documentation of completed service work.
- Built a strong foundation in physical security, customer-facing technical support, cabling, low-voltage systems, and security equipment lifecycle maintenance.
